**WYOMING'S FIRST PRIVATELY OWNED BUILDING TO RECEIVE
USEPA'S PRESTIGIOUS ENERGY STAR® LABEL**

(LARAMIE, WYOMING)--- The U.S. Environmental Protection Agency (USEPA) announced that Trihydro Corporation's corporate office in Laramie has earned the agency's prestigious ENERGY STAR® label. It is the first privately owned building in Wyoming to earn the label, which the USEPA gives to the most energy efficient buildings in the United States.

Trihydro's new corporate headquarters, located in the Laramie River Business Park (Laramie, Wyoming) was designed and built to be energy efficient and environmentally friendly, as well as provide a comfortable work setting for employees with state of the art technical capabilities. The 23,000 square-foot facility, completed in June 2004, includes office space for approximately 130 employees with training, meeting, and conference rooms. The architectural layout and design, operating systems, and the materials used in construction all contribute to the building's requiring significantly less energy than the average office building for heating, cooling, and lighting.

About ENERGY STAR

ENERGY STAR is a voluntary partnership between business, government, and others united to protect our environment for future generations by changing energy-efficient practices today. ENERGY STAR works to improve the energy efficiency of products, homes, buildings, and businesses. Business can use ENERGY STAR to improve efficiency, enhance profits, and create a competitive advantage. Last year alone, ENERGY STAR helped businesses and consumers save more than \$5 billion in energy costs while reducing greenhouse gas emissions equivalent to those of 10 million cars. For more information about ENERGY STAR, visit www.energystar.gov or call toll free 1-888-STAR-YES (1-888-782-7937).
