## **TRIHYDRO CELEBRATES 20<sup>TH</sup> ANNIVERSARY**

LARAMIE, WY, DECEMBER 20, 2004...Trihydro Corporation, a leading provider of engineering and environmental services, is celebrating its 20<sup>th</sup> year in business this month. In 1984, Henry R. Richter and John Ahern founded Trihydro as a small groundwater consulting firm in Laramie, Wyoming. Over the last 20 years, Trihydro has grown into a 150 person firm offering services nationwide from eleven offices. Trihydro has managed to successfully operate and grow in one of the more fragmented industries in the United States, enabling the Company to provide a full range of services to Fortune 500 companies, as well as state and federal agencies.

Trihydro's president, Jack G. Bedessem, attributes the company's success to its ability to adapt to changing markets. "Over the last 20 years, we have seen many changes in our industry including: increased mergers and acquisitions; an increase in the number of small specialized firms; consolidation of suppliers by our clients; decreased regulatory drivers; and shift toward commodity based services. Trihydro has worked to proactively to identify these trends and adapt in order to best serve our existing and future clients. And we plan to do so for the next 20 years."

Trihydro commemorated the occasion of its 20th anniversary with an internal contest whereby employees submitted, then voted on a 20 year anniversary slogan to be used for the upcoming year. The winning slogan, developed by Tom Fleener of Trihydro's El Dorado, Kansas office was revealed at the Company's annual Holiday Season party. The slogan will read, "Twenty Years of Success is No Accident. Solutions...Safety...Performance...Trihydro."

### **About Trihydro**

Trihydro is a mid-sized, expert environmental and engineering consultancy committed to providing environmental and engineering services that support their clients' business decisions. By offering a complete range of specialized solutions in disciplines including but not limited to: hydrogeology, engineering, chemistry, regulatory compliance and toxicology, Trihydro offers solutions that satisfy specialized needs while also providing the greatest bottom line benefits. Trihydro is dedicated to merging high-quality, high-value environmental and engineering services and business perspectives.
