Trihydro Selected as One of Twelve ConocoPhillips' Environmental Remediation Convergence Contractors

LARAMIE, WY, October 27, 2004... ConocoPhillips recently conducted an extensive evaluation of pre-qualified contractors and selected twelve companies to supervise its ongoing environmental remediation work at approximately 3,700 sites in 47 states. The contractor evaluation and convergence process was conducted in an effort to reduce the number of contractors and streamline management of its environmental remediation project portfolio. Laramie-based Trihydro Corporation, a recognized leader in engineering and environmental consulting and contracting, was among those firms designated as one of ConocoPhillips' Environmental Remediation Convergence Contractors.

Trihydro was awarded the contractor status based on the firm's health and safety record, as well as its qualifications, expertise and ability to manage complex remediation work typically encountered in transportation, refinery and multi-party remediation projects. "We are very happy to continue our successful relationship with ConocoPhillips. This is a tremendous opportunity for Trihydro to provide the right mix of capabilities and skills and to provide innovative solutions to complex remediation projects," stated Cal Niss, Vice President at Trihydro. "We are looking forward to supporting ConocoPhillips in meeting its project objectives."

ConocoPhillips is an international, integrated energy company. It is the third largest integrated energy company in the United States, based on market capitalization, oil and natural gas reserves and production. Additionally, ConocoPhillips is the fourth largest refiner in the world. ConocoPhillips completes up to \$150 million in remediation work annually.

About Trihydro

Trihydro is a mid-sized, expert engineering and environmental consulting firm based in Laramie, Wyoming with 11 offices throughout the United States.
