

TriHydro Awarded GSA Multiple Award Schedule Contract

LARAMIE, Wyoming, July 10, 2003 -- TriHydro was awarded a Multiple Award Schedule (MAS) contract (GS-10F-0487N) from the General Services Administration (GSA). GSA is a centralized federal procurement agency created to improve government efficiency and effectiveness. Under the MAS program, federal agencies can award work to TriHydro based on an evaluation of "best value" without necessarily going through the competitive bid process. Because the MAS program essentially "preapproves" our pricing and qualifications, government agencies can come directly to TriHydro for work without issuing an RFP.

Additionally, TriHydro was certified as a certified HUBZone firm for Environmental Remediation Services (NAICS 562910) in November 2002. TriHydro's combination of a GSA contract holder and HUBZone certification provides federal agencies with a unique opportunity to help meet their diversity contracting goals while using a pre-approved firm with an established reputation for high quality services.
