

SOLUTIONS YOU CAN COUNT ON.
PEOPLE YOU CAN TRUST.

As leaders in

ENGINEERING & ENVIRONMENTAL SOLUTIONS,

Trihydro will:

Exceed our clients' expectations

Empower our employees & work safely

Improve our communities & the
environment

Adjusting the injection rate on a solar powered bioremediation system.

FOUNDATION

IN 1984, WE STARTED SOMETHING SPECIAL.

Our environmental and engineering consulting firm was founded in Laramie, Wyoming. We've grown, but we've never lost our tenacity for problem solving and for working side by side with our clients to achieve their goals.

As part of a commitment to environmental sustainability, Trihydro installed a solar photovoltaic system at one of our offices.

INTEGRITY

WE'VE STUCK TO CERTAIN PRINCIPLES.

What sets Trihydro apart as one of the nation's top engineering and environmental firms is not just the quality of our work or the depth of our experience, but our unwavering commitment to integrity. We are in business to succeed, but never at the expense of our principles and values. We're committed to earning your trust – and keeping it.

Trihydro field technician collects critical remediation data from a centralized control panel.

COMMITMENT

WE'VE REFUSED TO COMPROMISE ON SAFETY.

Our dedication to achieving “Zero Incidents” has helped us create a team equipped with health and safety awareness and skills above and beyond industry standards. We value our employees and recognize them as mothers, fathers, sons, and daughters who deserve to go home safely each night. When we work with you, you become part of our family and can count on our commitment to safety in every aspect of what we do.

SUCCESS

WE'VE UNITED SMART PEOPLE WITH THE TOOLS FOR SUCCESS.

Our work begins and ends with people. We realized early on that the best solutions come from truly understanding your goals and from giving our people the right tools to achieve those goals. Every day, we combine science, engineering, business, and technology to do just that.

AUTHENTICITY

MOST OF ALL, WE'VE STAYED TRUE TO OUR ROOTS.

Today, Trihydro has expanded to 500 employees with offices throughout the U.S. Our dedicated managers, scientists, and professionals provide the most effective, responsive, and safe solutions around. As we continue to grow, we won't lose sight of doing business the way our employees, partners, and clients deserve.

MARKETS

PETROLEUM

Trihydro kicked off its first project in the petroleum industry in 1985—and this work has formed the core of our business ever since. As the challenges of this sector have evolved, so have we, honing our skills and strategies to offer you extensive technical and regulatory expertise – from air compliance and cost-effective remediation to long-term operations and maintenance.

INFRASTRUCTURE

From small roads in remote regions, to municipal water and wastewater systems and million-dollar developments, we understand the challenges of infrastructure design and maintenance. These are the things that form the backbone of our nation. Our engineers are passionate about keeping the environment clean, the water flowing, and the traffic moving.

CHEMICALS

The chemical industry is at the forefront of the research, manufacturing, and distribution efforts that make the world go-round. Due to the spectrum of chemicals this sector handles, a large network of environmental regulations govern industry activity. Trihydro partners with owners and operators in the chemical sector to confirm their assets and operations align with applicable regulatory frameworks.

INDUSTRIAL & COMMERCIAL

The industrial and commercial sector spans a wide range of facilities and operations, each with regulatory nuances and specific business challenges. Our expertise applies in many of these industries and includes having completed facility closure, unit closure, and/or corrective action at nearly 300 RCRA sites in 48 states, as well as Canada and Puerto Rico.

GOVERNMENT

With 500 personnel, we are one of the largest HUBZone-certified (NAICS 562910) contractors in the country. Our seasoned team of experts understands the unique challenges government personnel face, and provides responsive performance, thorough project execution, and cost-controlled services in support of projects of all sizes.

MINING

We understand the importance of mineral commodities and natural resources to everyday life, and recognize the positive influence associated projects have on the economy as well as the importance of developing and managing natural resources in a fiscally and environmentally sound manner. Our consulting practice embraces a focus on helping our clients achieve critical mining and natural resource planning, development, and protection goals safely and effectively.

Construction oversight on a waterline upgrade project.

Performing leak detection and repair (LDAR).

SERVICES

ENVIRONMENTAL

We have managed environmental projects in countless industries, landscapes, geologies, climates, and regulatory frameworks. This experience has taught us that environmental project success depends on a clear vision of a desired outcome. Our environmental project teams are seasoned experts when it comes to balancing regulatory requirements, liability, and your business goals.

- Emerging Contaminants
- Hydrology & Natural Resources
- Land Reclamation
- Planning, Management, & Regulatory Compliance
- Remediation
- Risk Management
- Site Assessment, Characterization, & Modeling
- Solid Waste Management

WATER AND WASTEWATER

Proper water resources planning, restoration, development, and protection measures have never been more critical than they are today. Trihydro offers expert water and wastewater consulting services in both public and private sectors to address your evolving water development, supply, demand, and quality challenges with solutions that will last.

- Water Resources Planning & Management
- Water Development
- Water Treatment & Supply
- Wastewater Treatment & Collection
- Dam Design & Safety

ENGINEERING & SURVEYING

Selecting an engineering and surveying firm can impact a project's entire lifecycle, including costs, performance, and quality. Our team seeks to serve as an extension of your staff. We align ourselves with your goals and processes and provide in-house quality assurance. We seek to offer not just services, but value you can build on.

- Infrastructure & Civil Site Design
- Surveying & Mapping
- Transportation Design & Construction
- Unmanned Systems & Remote Sensing

AIR CONSULTING

Our professionals have spent the past 26 years becoming experts in state and federal Clean Air Act and related regulations for oil and natural gas, petrochemical, and manufacturing industries. We know it's a daunting task, and we'll get you on track for headache-free compliance.

- Air Permitting
- Compliance & Auditing
- Greenhouse Gas Management
- Leak Detection & Repair (LDAR)

TECHNOLOGY CONSULTING AND SOFTWARE

Trihydro provides client-specific information technology consulting and develops user-friendly desktop and web applications for environmental site data. Our customizable software solutions translate raw data into powerful decision-making information, ready at your fingertips.

- Data Management
- Connected Vehicles
- Software Development
- Products
